Andersen Fuel-Efficient Mudflaps

Makers of a new patented tractor-trailer mudflap say it delivers at least 3 percent fuel savings as well as cutting blinding road wash spray.

Four traditional mudflaps cupping air behind a rig's tires contribute more than 5 percent to this overall drag effect, according to the company.

Andersen mudflaps, while providing traditional mudflap function, have an open design that allows air to flow through them along with reducing road spray.

Dana Smartwave TPMS For Retrofit

Dana's Commercial Vehicle Systems group announced that its SmartWave TPMS tire pressure monitoring system is now available for retrofit installation on a variety of commercial truck models through original equipment dealerships.

Dana's SmartWave TPMS is a real-time electronic system that actively and accurately measures the air pressure and temperature for

each tire on a vehicle. The system transmits data wirelessly to a receiver mounted on the vehicle and displays the information in the cab.

Initial configurations available include 4X2 with standard dual tires, 6X4 with wide-based tires, and 6X4 with standard dual tires.

Kelderman's Hydraulic Bed

Kelderman's hydraulic bed hauler for medium-duty trucks is designed for easy loading and unloading. The bed separates from the cab, traveling to the ground for cumbersome or heavy loads. Rollers provide a smooth transition for loading and unloading cargo.

The conversion allows for a quick detach for different beds and

includes a heavy-duty hydraulic power pack, front and rear storage compartments, and a handheld remote for easy operation.

Kelderman's bed hauler is now available for most late model medium-duty Ford, Dodge, Chevy/GMC, Freightliner and International trucks.

Non-Smoke Smoke Odor Eliminator

A powerful new spray called Non-Smoke provides a safe and easy way to eliminate smoke and other offensive odors in the cab.

Non-Smoke works by changing the molecular structure of offensive odors and neutralizing them, according to the manufacturer, which also says it contains four times the active ingredients found in most other air freshener sprays.

Racor SootChek Portable Oil Monitor

Parker Hannifin's Racor Division said its SootChek portable oil monitor is a handheld, battery-operated diagnostic tool that measures soot concentration levels in diesel engine lubricating oil up to 10 percent and higher, without sample preparation or solvents. The test can be completed in 45 seconds.

SootChek gives maintenance personnel an on-site, immediate and accurate measurement of the engine oil soot levels, so that oil can be changed before soot concentrations are too high.
